MDF – EcoDrain Unit

The new developed “EcoDrain Unit” allows the dewatering degree of wood chips in the plug screw to be increased. A newly designed dewatering zone allows easy exchange of the wear parts.

- ▶ Payback after approx. 6 months
- ▶ All plug screw assemblies retrofittable
- ▶ Increased dewatering of the wood chips
- ▶ Energy savings in downstream processes
- ▶ Simple wear parts exchange
- ▶ Low maintenance costs due to exchangeable wear parts
