MDF – BEP (Bearing exchange program)

It is our goal to minimize downtimes of PALLMANN Refiners because of expected or unexpected bearing overhauls/ repair work. Therefore, we established our new Bearing Exchange Program. This program includes a supply of a new or complete repaired bearing unit (like new condition) in exchange to the existing assembly, which we offer to purchase from you.

- ▶ No long downtimes due to repair work. No repair cost. New bearing assembly can be delivered immediately and is ready for installation.
- ▶ After installation and start-up of new bearing, the existing bearing needs to be sent to Pallmann and becomes our property.
- ▶ Favorable price offers
- ▶ The credit value for the bearing which we receive from the customers will be provided in advance before sending to Pallmann.
