### MDF – Slider for blow out valve

---

The design of the new slider of the PALLMANN blow out valve avoid the blockage during operation. The slider with slider plate is available for different application like soft wood, hard wood or mixed wood operation. The new slider can be used in all PALLMANN Refiner blow out valves.

- ▶ Easy exchange of the parts from existing to new design.
- ▶ The new design will have a “self-cleaning effect” to avoid blockage of the blow out valve
